Don:

Our office got an email about a roll-off box located at (b) (6). The reporting party believed that it may have been associated with the CES Site. I dispatched my contractor go and look at it and here are the pictures. From what we can tell, this box is not related to the CES Site. According to my contractor, the box contains rotting garbage that smells very bad. The rotting odor smell is apparently impacting the neighbors near the location. I recommend that one of your investigators investigate this situation and coordinate with (b) (6) (local resident) at the email (b) (6) or (b) (6).

Thanks
